

ACTIVITY PACK

Activity 3: Prompts

Activity 3 - Build an Animated PowerPoint with the Agent

Course	AI Security for Autonomous AI Agents
Course code	TGS-2025060473
Version	4.0 25 August 2026

Tertiary Infotech Pte Ltd | UEN 20120096W

Prompts

Activity 3 - Vague vs Detailed Prompts

Evidence status: SIM - all data is fictional. Use with SCRIPT .md in the Hermes (MiniMax) agent. Send the vague prompt first, then the detailed one, and compare the decks.

Vague prompt (send first)

"Make me a presentation about our marketing plan."

(Notice what it guesses: number of slides, style, animations, which points to include.)

Detailed prompt (send second)

"Build a 5-slide animated PowerPoint from the script I gave you, for the fictional Sunset Bay Resort 2026 Marketing Plan.

>

- Use the Envato template called [write the template name you chose, e.g. 'Aurora Business'].
- Exactly 5 slides, matching my script: Title, Where We Are Today, Our 2026 Goals, How We Get There, Summary.
- Add a title animation (fade or slide-in) to the heading on every slide.
- Keep 2 - 3 short bullets per content slide - do not add points that are not in my script.
- Make the last slide a clear summary with the 4 key takeaways.
- Brand tone: warm, welcoming, confident - this is a friendly beachfront resort, not a bank.
- Return the finished deck as a downloadable PowerPoint file."

Compare - three things the detailed prompt controlled

1. _____ (e.g. exact number of slides)
2. _____ (e.g. animation on titles)
3. _____ (e.g. brand tone / no invented points)
