Readme

Activity 1 - Threat Modelling a Generative AI Concierge

Course: AI Security for Autonomous AI Agents **Course Code:** TGS-2025060473 | **TSC:** ICT-INT-0052-1.1 **Block:** Day 1 - Generative AI Security

At a glance

Duration	45 minutes
Format	Small groups of 3 - 4, plenary debrief
Type	Real-world case study
Learning Outcome	LO1
K/A statements assessed	K2, K3, A4

Purpose

Learners threat-model a live hospitality GenAI concierge, identify trust boundaries and attacker-writable retrieval sources, turn each application mode into an attack surface, and make a rollout recommendation with costed controls.

Files in this folder

File	Audience	Use
SCENARIO.md	Learner	The case study narrative, artefacts and data
DISCUSSION-QUESTIONS.md	Learner	The five questions to work through in groups
SECURITY-CHECKLIST.md	Learner	Deployment evidence checklist for the concierge
Activity-1-*.pdf	Learner	Printable full learner pack including the checklist

How to run it

- Set up (5 min).** Form groups of 3 - 4. Issue SCENARIO.md and DISCUSSION-QUESTIONS.md. Trainer debrief notes are supplied separately and are not stored in the learner-facing Activities folder.
- Group work (45 minutes).** Groups work the five questions in order. Circulate; the questions are designed to be argued, not looked up.
- Presentation.** Each group presents its answer to one nominated question.
- Debrief.** Use the separate trainer notes to draw out the teaching points and correct recurring misconceptions.

Step-by-step instructions for this activity are in the Learner Guide. The slide deck carries the scenario and the discussion questions only.

Alignment

Every question in DISCUSSION-QUESTIONS.md is tagged with the K or A statement it evidences. This activity contributes to **LO1** and is assessed through the Written Assessment (SAQ) and the Case Study.
